*Release stable*

January 10, 2015

TODO list

- Implement OrderedSet type
- Implement iterate method
- Implement Tuple type
- Implement Product method
- Implement couple for forAll and exists method
- Check all operators
- Add test to lists
- The scope of all iterate operations is limited to the variable of the previous iteration

and no other variable coming from the context are used.

- Operations cannot be applied to built-in lists.
